

It is my understanding that you are considering changing the format for local broadcasting. KLOVE 91.1, and 88.3 perform an important function for our family and the community. They provide family-safe broadcasting. I know when my children listen to the programming on KLOVE that I don't need to worry about the promotion of sex or violence in the music or the comments. As a parent, I value the comfort of knowing I don't need to edit or play watchdog when my family listens to this radio station.
